

Plantas Provechosas

Absolute extracts, inspired by ancestral knowledge
*and developed with a strong commitment
to the preservation of nature.*

PROJET 
NAUYACA

Discover our variety of absolute extracts:

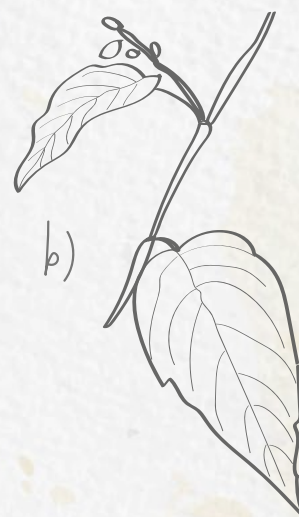

DRY FOREST PLANTS, CERRO GRANDE, COLIMA.

Scientific name	Traditional name
1. Adiantum Capillus Veneris	Venus hair
2. Castilleja Arvensis	Bull's blood
3. Cestrum Parqui	Zapotillo
4. Gaultheria	Gaultheria
5. Salvia Cardinals	Red-flowered myrtle
6. Salvia Elegans	Salvia
7. Salvia Gravida	Salvia Gravida
8. Salvia Hispanica	Chia
9. Salvia Sessei	Sabanito
10. Usnea Barbata	Old man's beard

RAINFOREST PLANTS, XALAPA, VERACRUZ.

Scientific name	Traditional name
11. Gnaphalium conoideum Kunth	Gordolobo
12. Gnaphalium chartaceum Greenm	Gordolobo
13. Miconia albicans Steud	Mullein flower
14. Piper auritum Kunth	Acoyo
15. Plantago lanceolata L.	Seven veins
16. Plantago major L.	Foot plant
17. Sambucus nigra var.mexicana	Blue elder or Mexican elderberry

*Salvia
Sessei*

For more detailed information, we offer a document that compiles the results of scientific research on each plant and its pharmacological uses.

Harvesting

We select our plants based on key principles of sustainability, ensuring the responsible use of biotic resources and the protection of biodiversity. Our plants are not rare, protected, or endangered species. The unpolluted harvesting areas are located in forests that are voluntarily protected by their owners. When harvesting, we carefully cut the leaves, flowers, and part of the stem, always leaving the roots intact to encourage regeneration.

We also adhere to annual extraction limits.

The Production Process

To prepare our ***absolute extracts***, we use 150 grams of fresh plants per liter of 96° alcohol and allow the mixture to macerate for five weeks. The entire process is carried out in compliance with strict hygiene standards to ensure purity and preserve the product's long-term properties.

Sourcing

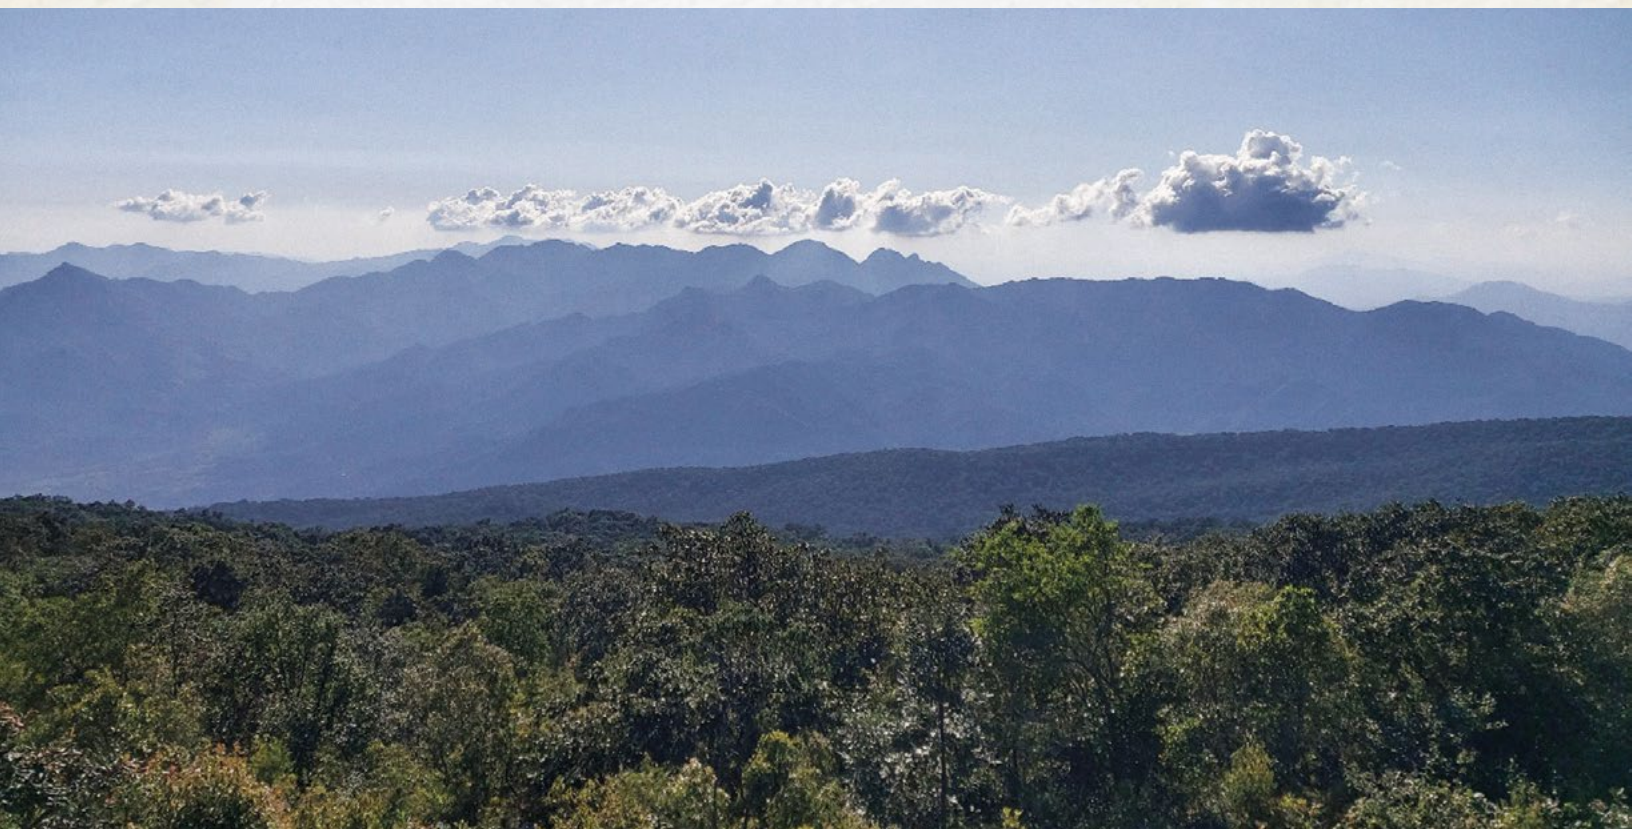

Our commitment to our customers is to maintain exceptional quality and a sustainable supply each year.

Nauyaca Project

We contribute to the respect for nature
by supporting those who protect it.

We are a non-governmental organization dedicated to international cooperation for sustainable development since 2013. Our mission is to implement commercial projects aimed at increasing the incomes of individuals and groups who are already making a significant contribution to the protection of ecosystems and soil fertility.

In Mexico, we have a network of 58 members across 10 regions of the country, from which we offer natural substances for pharmaceutical, cosmetic, and cleaning applications. We have two production centers for absolute extracts, and our offerings are growing each year thanks to advancements in our field research and the valorization of traditional knowledge. It's worth noting that Mexico is recognized as one of the five most megadiverse countries in the world, hosting around 12% of the world's biodiversity on just 1.5% of the planet's surface area.

*Salvia
graveida*

Discover the quality and purity of our ***absolute extracts***, sustainably produced with a strong commitment to forest preservation and the protection of biodiversity.

We invite you to request a free sample of our product and choose the plants that interest you most. We offer 150 ml and 250 ml presentations to suit your needs.
